

SoCal Gas[®] Controllers and Dual Set Point Controllers for Natural Gas Water Heaters/Boilers

An efficient controller can reduce natural gas consumption and reduce water heating bills by up to 20 percent. Save \$700 on graph model controllers for buildings of 35 units or fewer. Save \$1,400 on graph model controllers for buildings of 36 units or more.

If there is a demand-controlled recirculating pump previously installed at this site, the property may be ineligible for this measure.
